**Philip Bremner**  
Senior Consultant

## BRIEF BIO

Mr. Bremner has nineteen years of SAP experience leading development in ABAP, FI, PS, PPM, MM, and BW with application design, legacy data integration, and cross system web service integration. His PS background integrated directly with MM/FI/CO and Assets supporting Goods Movement, configuring validation and substitution rules, Settlement procedures, MM Invoice Verification and Goods Recievable. A strong business focus, wide range of skills, and passion for delivering quality work forms the base of his design skills. With extensive development experience in ABAP, OOP, EAI, Web Services, BW, C#, SQL, and MS Office integration he is skilled at developing and integrating in multiple methodologies. Mr. Bremner has SAP development and integration experience in DynPro, WebDynpro, Smartforms, and Hana UI5 development.

## REPRESENTATIVE ENGAGEMENTS

### **Company: SAP Huddle Inc - (June 2018 - September 2018)**

- **Industry:** Information Technology
- **Specific Role:** SAP ABAP Functional and Technical Consultant
  - SAP HANA XSA Fiori development

### **Company: XOJet Company - (August 2017 – May 2018)**

- **Industry:** Premier Transportation
- **Specific Role:** SAP ABAP Functional and Technical Consultant with FI and SD focus
  - Rewrite of an AP Invoicing ALV Grid program supporting enhanced data editing.
  - Smart Form AR development supporting external DB extraction.
  - SD - Customer Line Items (FBL5N) enhancements with BTE
  - SD - Change Sales Order (VA02) enhancement validating contract and available funds.

### **Company: Pacific Gas and Electric - (December 2015 – March 2017)**

- **Industry:** Utility
- **Specific Role:** SAP PPM/PS Functional and Technical Consultant
  - Support member with the PG&E Project Management team. PS and PPM functional and technical support.
  - Independent contractor working with Platinum DB Consultants to implement a PPM-BW– Integrated Planning on Office Analysis for Excel POC project.
  - Specific focus on BW IP and AO for Excel implementation, WebDynpro development, and data conversion. PPM WebDynpro Object Oriented ABAP development.
  - User Exits an Enhancements

### **Company: Canadian Pacific Railroad & BNSF Railroad (Jan 2015 – Nov 2015)**

- **Industry:** Railroad
- **Specific Role:** SAP ABAP Technical Lead

- CPR (Canadian Pacific Railroad), implementing a legacy system data migration and integration for their CTN DB (Common Track Network) into an SAP Linear Asset Management (LAM) framework, generating a custom, highly configured LAM Functional Location structure. Supporting CPR's Railroad Work Management was the challenge of the project. Delta load is supported through a PI (ES) inbound interface; Integration with PI; LAM BAdI's
- Strong SQL query in DB data analysis and quality verification,
- Strong Object Oriented ABAP development,
- BRF Business Rules Framework integration with CUnits, developed a small proof of concept
- BRF application for integrating field hour time posting using a Compatible Unit Framework
- User Exits and Enhancements

#### **Company: Pacific Gas and Electric – Pathfinder Project (Oct 2012 – Dec 2014)**

- **Industry:** Utility
- **Specific Role:** Architect & Technical Lead
- Worked as the Technical Lead and Architect developing the Gas Distribution a SAP to ESRI GIS integration system (Project Pathfinder). The project contained a web service inbound and outbound interface passing through PG&E's messaging server to/from GIS. Leveraged BAPIs; Implemented and integrated with SAP GEOe and the ESRI GIS system.
- Workshop technical support in analysis of project requirements
- Architected an OO web service API to support cross systems integration through Telvent ArcFM (ESRI) to SAP PM and SAP GEOe
- Developed a legacy data migration of "Distribution Pipe" into SAP as equipment through the application of BAPIs

#### **Company: Dominion Resources (July 2012 – Oct 2012)**

- **Industry:** Utility
- **Specific Role:** WebDynpro application developer
- Developed a WebDynpro application as the core project interface, for Dominion Resources (previous engagement), integrating a CUnits configuration.

#### **Company: Aera Energy (2009 – July 2012)**

- **Industry:** Energy
- **Specific Role:** SAP Project Systems Functional Analyst
- Implemented an SAP, Impress, MS Project software system that introduces "standard" project planning to the enterprise
- Architected a customized configuration making strong use of SAP enhancement points and MS C# web services. The SAP configuration is IS-Oil based with strong FI-CO support using PS Network-Activities and IM Budget functionality.
- Operated as PS Functional Lead with primary focus on integrating SAP PS and Investment Management in the corporate framework. Strong PS-IM-BW integration.
- Strong Materials to AP integration
- Strong PS Structures, WBS, Network, User Status Profiles, Cost Planning, CATS, Materials, ...
- Strong configuration and ABAP level technical. BAPI integration with PS, CO, MM, ...
- Integrated CO Settlement from Network Cost Collectors to target depreciated Assets.
- Investment Management (SAP IM) with associated budgeting and budget controls.
- Custom Overhead integration, custom IM Budget limit integration.

**Company: Aera Energy (2005 – 2009)**

- **Industry:** Energy
- **Specific Role:** SAP BW Architect ABAP Developer and Administrator
  - Covered all aspects of SAP BI development. Includes FI, CO, MM, PM, PS, HR, and LSO. Extensive SAP source side and BW user exit integration. Included Informatica to SAP Power Connect development.
  - Implemented FI GL, COPA, PM, PS, MM, LSO, HR, from SAP ECC to BW. Includes business content extractors, custom cubes, delta extractors, and reports.
  - Strong data ETL development
  - Custom ALE/IDoc integration
  - Provided 24/7 support for BW operations
  - Strong custom Process Chain development
  - Configured and managed the LO Extractors

**Company: Aera Energy (1998 – 2004)**

- **Industry:** Energy
- **Specific Role:** Senior SAP ABAP Developer
  - Covered all aspects of ABAP programming from reports, RFCs, Dialog programming, User Exits, Enhancements, BDCs, LSMW, BADIs, SAP Script
  - Proficient in SAP ABAP Objects
  - Led development of many custom applications with strong OO Design, control framework, Dynpros, ALVGrid, and in depth integration with PM, MM, FI, CO, HR, ...

**Company: Pinnacle Resources Inc. (1996 – 1997)**

- **Industry:** Consulting
- **Specific Role:** Software Developer, MS C++

## EDUCATION

- 1990–1992 State University of California at Bakersfield  
B.S., Computer Science Hardware; Mathematics minor.  
Graduated with *cum laude Honors*.  
State University of New York at Buffalo  
B.S., Industrial Engineering; Mathematics minor.

## CERTIFICATIONS

- 2015 OpenSAP; ABAP Development for SAP HANA, SAP Business Warehouse powered by SAP HANA, Mobil Apps on SAP HANA Cloud Platform
- 2014 Project Systems Certified, Application Associate (C\_TPLM22\_60)
- 2005 SAP Netweaver-BI BW
- 2003 SAP ABAP Development Consultant
- 1997 Microsoft Solution Developer (one of the first MS Certifications emphasizing C++ Object Oriented Design)
- 1994 MS Certified Professional
- 1999 MS VB for Desktop
- 1999 MS Designing and Implementing Distributed Applications
- 1997 MS Developing Applications with C++ Using MFC
